## EDUCATION

**Dr BR Ambedkar National Institute Of Technology, Jalandhar**  
*B.Tech in Electronics and Communication Engineering*

2020 – 2024

## EXPERIENCE

### Infosys (Apple Client Projects)

July 2024 – Present

*Software Developer Engineer(Job Level 5)*

*Bangalore, Karnataka*

- Completed intensive training in **Java, Spring Boot, and Angular**, gaining end-to-end exposure across all layers of enterprise application development
- Worked across the **presentation, service, and persistence layers**, building **Angular** UIs integrated with **Spring MVC**, implementing business logic using **Spring Core** and **RESTful microservices**, and designing data access layers with **Spring JPA** and **Hibernate**
- Contributed to the **migration of backend services** from JAX-RS to the **Spring Framework**, improving maintainability and consistency
- Upgraded project dependencies and refactored **200+ controllers** to optimize request handling and data flow
- Worked closely with QA and DevOps teams to support **integration testing**, environment validation, and production deployments
- Maintaining and enhancing a **Java-based microservices platform** comprising **7+ services** for Apple internal applications
- Implemented **bulk action functionalities** across multiple services, improving operational efficiency and reducing manual effort by **45%**
- Worked within **Docker**-based containerized environments, using pre-built container images to support development, testing, and deployment workflows
- Leveraged existing **Jenkins CI/CD pipelines** for automated builds, testing, and deployments across multiple environments
- Optimized **Spring Boot REST APIs** by refining database queries and backend logic, improving response times by **15%** and enhancing overall service performance
- Developed and maintained **JUnit 5** and **Mockito**-based test cases to support reliable feature development, contributing to increased code coverage and improved release stability

## SKILLS

**Languages:** C/C++, Java, Angular, REST APIs, Dart, Flutter

**Java Technologies:** Spring Boot, Spring MVC, Spring Data JPA, Spring Security, Hibernate, Microservices, Maven, JUnit, Mockito

**Databases:** MySQL, MongoDB, Elasticsearch

**Tools:** Git, VS Code, Android Studio, Eclipse, Spring Tool Suite, Postman, Proxyman

**Problem Solving:** Solved around **1000+ problems** on various coding platforms

**Core Competencies:** Backend Development, Microservices Architecture, API Development, Object Oriented Programming

## PROJECTS

### NewGen Customer | *Java, Spring Boot, MySQL, Angular*

Aug. 2024

- Developed a non-monolithic application with microservices: PolicyMS, CustomerMS
- Implemented MySQL database, JUnit and Mockito testing, centralized configuration, and service discovery using Spring Cloud Consul
- Used Spring Cloud Load Balancer for load balancing and implemented API Gateway for routing
- Developed a Single Page Application using Angular

### Java HTTP Server | *Java, Sockets, Multi-threading*

Oct. 2024

- Developed a basic HTTP server in Java to handle HTTP requests and responses
- Implemented request parsing, routing, and response generation from scratch
- Optimized for concurrency and efficient resource handling
